--------------- Summary ---------------

Software Engineer with 3 years of experience, passionate about building scalable, intelligent systems across web, mobile, and blockchain. I build scalable, user focused systems that blend technical precision with inventive problem solving. I use modern frameworks to turn complex ideas into intuitive products.

Skills

- Full Stack Development
- Blockchain Development
- AI and Machine Learning
- Database Management
- Version Control

- Community Development
- Research
- Team leadership and collaboration

Experience

Founder | AviraX Tech — Akure, Nigeria │ 01/2025 – Current

- Developed and maintained community vision, mission statement, and strategic plan.
- Built strong relationships with community members.
- Pursued networking events, trade shows, and industry-related meetings to increase brand awareness.
- Organized and approved tech and finance bootcamps and workshops.
- Appointed team leaders and delegated responsibilities.

Blockchain Developer Intern | Web3Nova — Akure, Nigeria │ 03/2025 – 08/2025

- Conducted research into new technologies related to blockchain development such as zero-knowledge proofs and sidechains.
- Performed security audits of codebase and evaluated cryptographic algorithms used in the system.
- Deployed distributed applications onto mainnet networks such as Ethereum and Move.

- Maintained full node wallets to monitor changes in the underlying protocol layers.

- Integrated blockchain solutions with existing enterprise software systems.

- Developed maintainable codebase using object-oriented design principles and best practices.

- Collaborated with product teams to define requirements for blockchain projects.

Full Stack Developer Intern | CodeAlpha — Lucknow, India | 02/2025 – 03/2025

- Utilized version control systems such as Git to manage codebase changes.

- Participated in daily stand-up meetings with project teams to discuss progress updates.

- Collaborated with other developers to design, develop, test, and deploy applications.

- Implemented and developed RESTful APIs to enable communication between backend services and frontend clients.

- Analyzed user needs to determine technical requirements.

- Documented test plans, testing procedures, and test results.

- Debugged existing codebase for errors and security vulnerabilities

Frontend Developer | Brain Bench Technology — Ado Ekiti, Nigeria |
10/2024 – 01/2025

- Developed and maintained user-facing websites using HTML, CSS, JavaScript, and React.js.

- Collaborated closely with backend developers to integrate API calls into the frontend codebase.

- Created UI components with reusable code for better user experience.

- Used version control systems such as Git to manage source code repositories in a team environment.

- Created prototypes of new applications or features to demonstrate potential functionality to stakeholders.

- Analyzed user needs to determine technical requirements.

Education and Training

- **Federal University of Technology, Akure (FUTA)** — Akure, Nigeria (2027-28)
  Bachelor of Technology: Computer Science
- **Ekiti Anglican Diocesan High School** — Ado Ekiti, Ekiti State
  O level certificate

Languages

- **English:** Proficient (C2)

- **Chinese (Mandarin):** Beginner (A1)

Certifications & Licenses

- Frontend Developer — Brain Bench Technologies

- Full Stack Developer — CodeAlpha

- Blockchain Developer — Hedera

- Blockchain Developer — Web3Nova

Activities

- Footballer, FUTA CSC Class '27 Football Team.
